Officer: _____

Division B

Officer: _____

Division D

Officer: _____

Division A

Officer: _____

Knob used to lift the board to access the storage below.

This Incident Command System consists of two tactical command worksheets mounted in a weatherproof case with built in legs. The worksheets have a dry erase surface that accepts magnetic tags that represent the Officers and apparatus at the incident. The Incident Commander will use the system to track the tactics and assignments throughout the duration of the incident.

Case Commander Incident Command System Specifications:

Black Weatherproof Polymer Case featuring;

40" long x 16.5" wide x 9" high

Heavy-duty in-line wheels

Two double layered, soft grip handles

6 press and pull latches for secure lockable closure

Nickel-plated steel lid stays hold case in open position

Permanently attached automatically adjusting air valve that won't let in water

Permanently attached folding and locking powder coated steel legs

Lower work surface is 34.5" from the ground with legs opened

1,175 cubic inches of storage below bottom worksheet in case

Two tactical worksheet white boards featuring;

34" x 12" Upper board permanently mounted inside lid with Velcro to receive passports

35" x 12.5" Lower removable board on base

Coated steel with subsurface printing

Surface compatible with dry erase markers

Separate tactical areas for managing;

Resources on scene and off

Staging including location and Officer in charge

Command and general staff

Operational assignment locations and Officer in charge

Tactical priorities and action plan

Life safety priorities and results

Search progress and results

Accountability of personnel including a PAR log

Scene layout and Officers in charge

Building Construction

Outside agencies including Utilities

50 Engraved magnetic tags to represent Officers, Positions, and Apparatus etc.

Up to two lines engraved, up to 14 characters per line

Color-coding includes:

Red, White, Green, Blue, Orange, Yellow and Black tags available

Tools include;

Multi-channel stopwatch clock

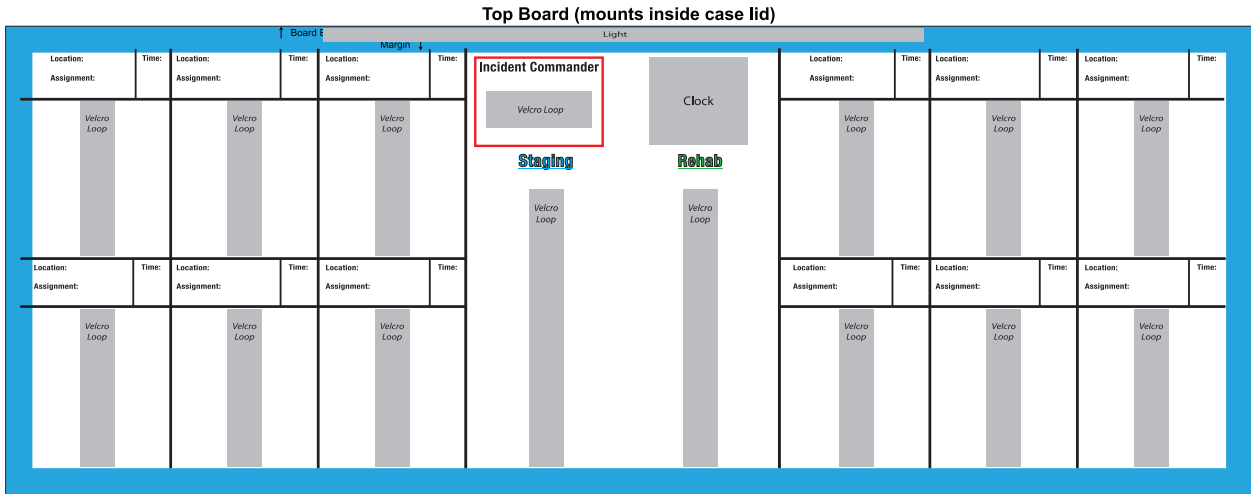

High efficiency LED light

3 Dry erase markers, one china marker and one dry eraser

I C Flag with pole

Case Commander™ Passport – USA edition

Top Layout

Bottom Layout

Bottom Board

The Bottom Board is a rectangular panel with a blue border. It contains several sections:

- Initial Report:** Fields for Situation Found, Incident #, Dispatch Time, Address, Occupancy Type, Construction Type, Truss? (Yes/No), Sprinklered? (Yes/No), Activated? (Yes/No), and Special Hazards.
- UNDER CONTROL:** A section with three options: Aggressive Interior Attack, Modified Exterior Attack, and Defensive Exterior Attack.
- STRATEGY:** A field for the incident strategy.
- REVISED STRATEGY:** A field for any revised strategy.
- LIFE SAFETY:** Fields for Victims Reported? (NO/YES), Primary Search (STARTED/COMPLETED), and Secondary Search (STARTED/COMPLETED).
- UTILITIES SECURED:** A checkbox field.
- OUTSIDE AGENCIES ON SCENE:** A checkbox field.
- PAR LOG - CALL EVERY 10 MINUTES:** A table with columns for TIME and RESULT, containing a repeating list of status checks (e.g., 'All present and accounted for', 'Deploy F.A.S.T. / R.I.T.').
- Sketch area:** A large white area for sketching the scene, with a note: 'Sketch scene below including any exposures at risk.'
- Officer Assignment:** Three boxes labeled 'Division A', 'Division B', and 'Division C', each with an 'Officer:' label and a small knob.
- Knob:** A knob labeled 'Knob used to lift the board to access the storage below.'

 The board is labeled with 'Board Edge', 'Margin', and 'Light' at the top.

This Incident Command System consists of two tactical command worksheets mounted in a weatherproof case with built in legs. The worksheets have a dry erase surface that accepts magnetic tags that represent the Officers, tasks and apparatus at the incident. The Incident Commander will use the system to track the tactics and assignments throughout the duration of the incident. Custom layouts are available.
